T1W 3J6 aaronmw@gmail.com

Product design and engineering leader with 20+ years of experience building systems, mentoring teams, and helping organizations ship cohesive products through cross-functional collaboration.

Experience: Informal Systems Inc., Senior Design Engineer 2022-2026

Led cross-functional frontend systems, internal tooling, and reusable web infrastructure across multiple decentralized technology teams. Also served as a Steward within the company’s distributed governance model.

Loopio Inc., Principal Product Designer 2018-2022

Worked at the intersection of product design and frontend engineering across three Agile teams, mentoring designers and leading the evolution of Loopio’s shared design system across Figma, React, and Storybook to improve collaboration, consistency, and implementation quality.

FreshBooks.com, UX Designer & Design Ops 2012-2018

Worked across UX research, interaction design, prototyping, and frontend implementation before helping steer FreshBooks’ platform redesign initiative. Later focused on improving Design/Development alignment through shared systems and workflows, while participating in the company’s leadership development program.

**York University / Sheridan College, Sept 2017-Apr 2019
Course Instructor**

Taught interaction design courses covering responsive design, UX/UI systems, and frontend web development, mentoring students from concept through implementation.

Fusetnet Inc., Interface Designer 2009-2011

Began in frontend design and development, later expanding into UX/UI design and implementation work across multiple internal startup projects.

**Education: York University/Sheridan College 2008-2012
Joint Program in Design BDes Honours**

Graduated magna cum laude from York/Sheridan’s Joint Program in Design (YSDN), focused on interaction and systems design. Served as Co-Chair of the Graduate Design Show, coordinating over 100 graduating students.

Tech. Skills: Design systems, React/TypeScript, Storybook, Figma, frontend systems, rapid prototyping, AI-assisted development workflows, HTML/CSS, Git.
